

SOP

MX925 Device Disposition Process

As part of the ongoing upgrade from Verifone MX925 terminals to PAX Aries8 devices, Pavilion Payments requires the secure and compliant disposition of replaced MX925 units.

Approved Device Disposition Option:

All MX925 devices must be sent to a certified electronic waste provider specializing in secure, environmentally responsible end-of-life processing. The provider must handle certified recycling, secure data management, and provide environmental reporting to ensure compliance with all applicable standards.

Important Notes:

- MX925 terminals must be disposed of properly through an approved e-waste provider.
- Improper disposal, abandonment, or unauthorized handling of devices may result in regulatory, environmental, or security exposure. Pavilion Payments reserves the right to pass through any associated remediation or recovery costs if improper disposal occurs.

Pavilion Payments' goal is to ensure a seamless transition while maintaining the highest standards of security and environmental responsibility. For assistance with coordinating device disposition, please contact Pavilion Payments at paxsupport@pavilionpay.com.
